An evolution of our well known LW 2103, now fitted with our SCD (screen compensation device) and with our "Virtual Three Way Tech." to eliminate the "comb filter" between both of the 15" bass units. Thus, this two way passive screen system, or for biamp, works as a three way system. This means a superb response, with very small equalization needs. One of the best sold models of our whole range, delivering natural sound to cinemas all over the world. To save labour costs, it is delivered pre assembled in two cartons.
